

Joan Mangel-Ackerman, Senior Sales Coordinator

**Chamberlain, Saskatchewan,
Canada!**

I live in a very small rural town; population approximately 85 people. I am married to a wonderful husband; Clayton. We have two precious daughters; Jolene is almost 9 and Jazmin is 7. They are true JP+ kids always sharing it with their friends! We have cattle on the farm and also grain farm. Clayton is also an electrician by trade. I am a journeyman cosmetologist of 24 years. Presently my JP+ business is allowing me to sell my salon and pursue my JP+ career and spend more time with my family! I am using my God-given mission to help as many individuals experience the true gift of optimal health from the “inside out” rather than just on the outside like I did with styling hair! I also love to help change people’s wealth as well for that: **TIME FREEDOM**” to spend more precious time with family & friends!

I was introduced to JP+ in 2005 by my massage therapist Tania! At the time my girls and I suffered from asthma. What really attracted me to it was knowing that it was totally safe especially for my young girls. Well...month by month we all became so much healthier! A year down the road I just knew I needed to share the gift of health with others so I approached my massage therapist to teach me how to share it!

I feel truly blessed for the JP+ product first and will continue to take JP+ for the rest of our lives. As a result of taking JP+ for almost 6 years now we do not have to use our daily inhalers that we once did. It has strengthened our immune systems so dramatically! I also feel blessed for my JP+ business as well. “It is the ultimate life-changing profession in the world!” What other business can you become healthier & change other lives in the process? It is so awesome working with like-minded individuals. We are all on a huge journey together to make the world a healthier place to live. **Life is precious!!**
