

Joseph A Cannizzaro, MD
Pediatrician
National Marketing Director
Longwood, Florida

Dr. Cannizzaro has studied at Fairfield University., Columbia University., Walter Reed Medical Center, University of Bologna, New York Medical College Cornell/New Rochelle, University Connecticut/Waterbury and with the American Board of Holistic Medicine. His interest in a preventive kind of medicine began 12 years ago with a personal major medical challenge. While being unable to return to work for a month he researched mind-body medicine for himself and decided this was what he wanted to bring to his patients. Almost nine years ago, he was introduced to Juice Plus+. Dr. Cannizzaro researched the product, the company, the doctors sharing Juice Plus+ with their patients, the research, and existing customers. After this he realized that Juice Plus+ was a simple way to alter the health patterns of his family and the families he saw everyday in the Pediatricians' Care Unit Clinic.

The ultimate incentive for taking extra time to teach families about good health and Juice Plus+ is; that from a base line of Juice Plus+, they change their health habits and promote a healthy lifestyle within the family. A step beyond that is that families that choose to share Juice Plus+ with their own family and friends can begin a very profitable and rewarding in-home business. (continued on page 2)

Carol Ann Cannizzaro, SSC

...New Englander, born in Rhode Island and graduate of URI. I moved to New York after graduation to teach elementary school. Along with the excitement of living in NY and near the “City”, I met my future partner for life. We recently passed our 40-year-partnership anniversary.

Joe was an Army officer and so we were married with the enchantment of a military wedding. I experienced the life & traditions as a military bride in West Point, NY at the Military Academy for 2 ½ years. I was teaching 5th graders and loved it.

Our adventures moved up a notch when we moved to Europe and became a financially challenged medical student family. We lived in Bologna 6 years (medical school at that time was 6 years.) We experienced Italian culture, language and food—Bologna is the kitchen of Italy. Back then, 30 years ago, everyone there lived on fruits, vegetables, fresh fish, wine and olive oil. There was no concern whether it was organic or not! It was always fresh, simple and delicious.

Our first son, Joe Jr was born there; our second son, Tom was born in New York during a year of internship; and our third son, Marc, was born in CT during Joe’s 3 years of Pediatric Residency.

We settled in Central Florida 26 years ago. For at least 20 years I was office manager for the Pediatricians Care Unit. Utmost in important is that most of our time in the states after medical school was spent under the influence of Golden Retrievers...1 dog, 2 dogs, litters twice...they’ve always enjoyed having us around their house.

As a wellness coordinator for Dr Joe, we can both teach the medical necessity of a healthy lifestyle for children and families through “well care”. Of course Juice Plus is a major asset in that healthy lifestyle goal.
